Significance: * p < 0.10, ** p < 0.05, *** p < 0.01. Table coefficients are posterior-weighted OLS estimates; surfaces use display-calibrated shapes.

Note. Table reports posterior-weighted OLS estimates. Surfaces use display-calibrated reference-shape coefficients. Display range: X=-0.400 to 0.400; Y=-0.400 to 0.400. White-ring markers identify mixed-signal configurations.
